European Journal of Operational Research 77 (1994) 516–517
North-Holland

Contents Volume 77

1 Containing groundwater contamination: Planning models using stochastic programming with recourse
J.M. Wagner, U. Shamir and D.H. Marks
27 A linguistic approach to stochastic comparison of queuing systems
F. Lin
40 Using case based reasoning for basis development in intelligent decision systems
J. McGovern, D. Samson and A. Wirth
60 An algorithm for the committee construction problem
D. Ceylan, Ö. Saatçioğlu and C. Sepil
70 Constrained gaming approaches to decisionmaking under uncertainty
M.J. Ryan
82 An investigation on the conditions of pruning an induced decision tree
H. Kim and G.J. Koehler
96 Interior dual proximal point algorithm for linear programs
R. Setiono
111 On using approximations of the Benders master problem
K. Holmberg
126 Strengthening Gilmore's bound for the quadratic assignment problem
D.J. White
141 An algorithm for the planar three-index assignment problem
D. Magos and P. Miliotis
154 Procedures for solving a 1-dimensional cutting problem
A. Corominas and J. Bautista
169 Solving a cutting problem based on existing patterns
A. Elomri, P. Morel, L. Pun and G. Doumeingts
179 The hybrid spanning tree problem
Y.L. Chen
189 Book Reviews,
L.F. Gelders (ed.)
Computer Science and Operations Research: New Developments in their Interfaces, *O. Balci, R. Sharda and S.A. Zenios (Eds.)*
Nonlinear Programming: Theory and Algorithms, *M.S. Bazaraa, H.D. Sherali and C.M. Sherali*
The Escapism of Operations Research, *N. Warrer*

195 Polyhedral structure and properties of a model for layout design
J. Leung
208 A state-space search approach for parallel processor scheduling problems with arbitrary precedence relations
P.C. Chang and Y.S. Jiang
224 Optimal sequential file search
G.E. Monahan
241 The two-group discriminant problem with equal group mean vectors: An experimental evaluation of six linear/nonlinear programming formulations
J.C. Hosseini and R.L. Armacost
253 Constrained regression median for measuring possible salary discrimination
T. Sueyoshi
272 Incorporating preference information into multi-objective scheduling
R.L. Daniels
287 The stochastic single machine scheduling problem with earliness and tardiness costs
H.M. Soroush and L.D. Fredendall
303 Stochastic optimization of the cost of automatic assembly systems
E. Tandiono and D.D. Gemmill
314 Convex programs with an additional constraint on the product of several convex functions
T. Kuno, Y. Yajima, Y. Yamamoto and H. Konno
325 A joint chance-constrained programming model with row dependence
T. Watanabe and H. Ellis

0377-2217/94/$07.00 © 1994 – Elsevier Science B.V. All rights reserved

344 Topological design of a centralized communication network with unreliable links and node outage costs
A. Dutta and R. Kawatra

357 Practical applications of OR in an underdeveloped nation
S.C. Aggarwal
375 Multiobjective modelling for regional agricultural planning: Case study in Tunisia
Y. Siskos, D.K. Despotis and M. Ghediri
392 Capacity expansion with alternative technology choices
S. Rajagopalan
404 On the complexity of preemptive openshop scheduling problems
C. Sriskandarajah and E. Wagneur
415 Scheduling a two-stage hybrid flowshop with separable setup and removal times
J.N.D. Gupta and E.A. Tunc
429 Job shop leadtime requirements under conditions of controlled delivery performance
S.T. Enns
440 Discriminant characteristics of US banks acquired with or without federal assistance
S.H. Zanakis and G.A. Walter
466 Integrated container loading software for pulp and paper industry
H.J. Fraser and J.A. George
475 Optimizing the assignment of aircrews to aircraft in an airlift operation
M. Kress and B. Golany
486 Direct and inverse solution of the Lanchester square law with general reinforcement schedules
R.L. Helmbold
496 An ME-based approximation for multi-server queues with preemptive priority
D. Kouvatsos and N. Tabet-Aouel
516 Contents Volume 77
